## THE STATUS OF ENGLISH AS A SUBJECT MATTER AND ITS CONTRIBUTION TO THE ACHIEVEMENT OF THE CROSS CURRICULAR LEARNING GOALS

As a means of communication, English will foster learner self-expression as well as appropriate interaction with peers and other interlocutors, which, in turn, will ensure access to universal culture through anglophone contexts.

As a subject matter, English will develop the learner's analytical and critical skills required by the syllabus mainly by drawing upon prior and academic knowledge to comprehend and use language as a system orally and in written form.

Both as a means of communication and a subject of study, English will be a means and a way for using information, data and communication technology, be it at the individual or cooperative mode through efficient working procedures.

The diagram below shows how the targeted skills and strategies interrelate.

## PRINCIPLES AND ASSUMPTIONS

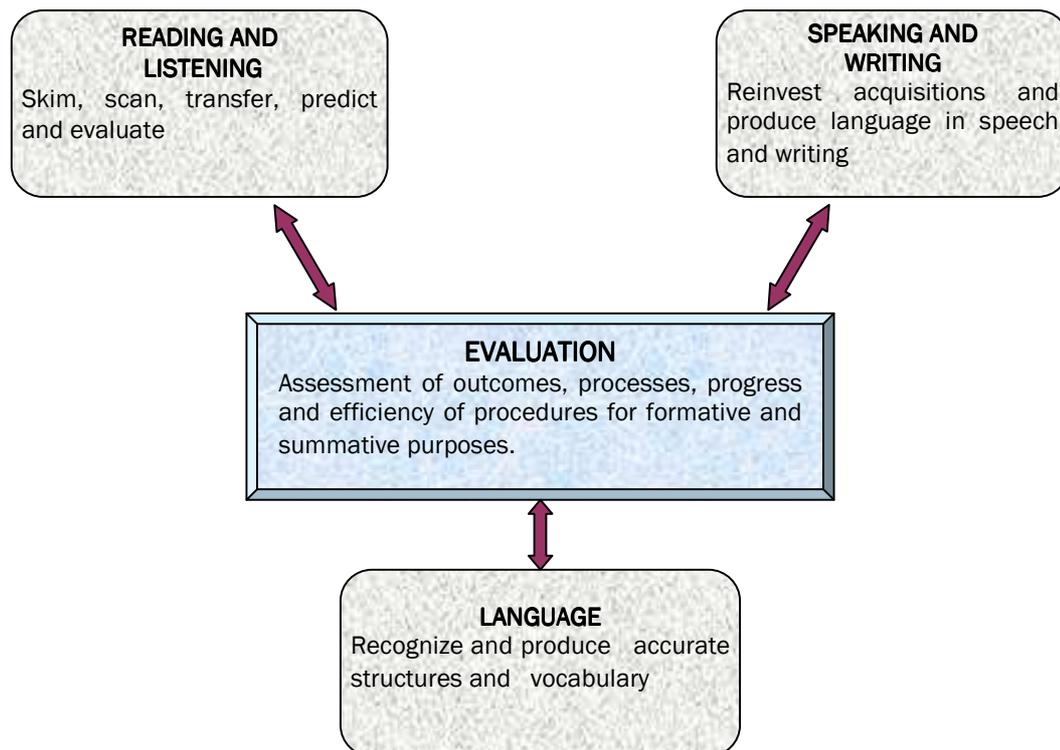

- **The learner is at the core of the learning process.** S/he is seen as an intelligent human being who comes to class with an attitude toward the language and toward learning.
- **Language is seen as a means of communication** (interactional, transactional, and functional) rather than a set of decontextualized grammatical structures, word lists and isolated language skills.
- **Language is seen as a system** that has lexis, grammar as well as linguistic structures and patterns which can be used **to create various discourse forms or text types.** Knowledge of grammar and how it functions contribute to effective language use.
- The teaching-learning process should foster **learner independence** so that the learner may continue learning by himself/herself, beyond the programme.
- Language learning is seen as incidental but **the teacher should create conditions conducive to learning.**

**What follows from these considerations is that:**

- **The learner becomes an active user of English** in the contexts and activities proposed in each learning session rather than a passive recipient of input provided by the teacher.
- **The learner needs to understand how the language system works** and how language conventions can **vary according to purpose, audience, context and culture** and apply this knowledge in speech and writing in both formal and informal situations.
- **The learner's** participation and **interaction** are important in learning the language and fostering **self-confidence and social relationships** among learners. Such relationships and interactions among learners within the context of learning English will nurture in learners **a sense of their identity.**
- **The teacher acts as a professional, creative manager** of classroom activities and of student learning.
- The language **skills** are developed as skill categories which **comprise several subskills and strategies;** their natural **convergence and integration** are basic principles to be implemented.
- **Learning sessions** serve not only to teach language items but also to develop new learning skills and strategies and / or help to transfer them from/to French and Arabic.
- **The topics and activities** interest the learners, challenge both their intelligence and their language ability and contribute to their linguistic and cognitive development.
- **Texts** are treated as representative of particular **genres** depending on the purpose and the target audience.
- **Words and structures** are presented in **meaningful contexts.**

- Language skills, lexis, grammatical structures, functions, text types and other language components are taught and **recycled at increasing levels of difficulty through the variation of activities and contexts.**
- **Assessment**
  - Learner assessment follows **naturally** from the teaching/learning activities done in class. It is **both formative and summative, process and product oriented.**
  - **Formative assessment is an ongoing process.** It is intended to help pupils in their development by providing information on what a learner can do as an English language learner / user in relation to the syllabus and its outcomes.
  - The learners' positive **interdependence within cooperative/collaborative work** is developed through **project work, portfolios, research and webquests.**
  - **Summative** assessment is intended to be an **indicator of learners' achievement.** It is carried out at the end of a period of study.

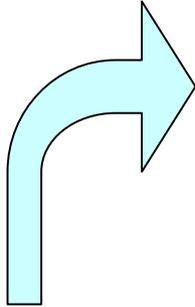

The following diagram shows the assessment aims and domains:

### IN READING AND LISTENING

The learner will be assessed on his/her ability to read / listen to various types of texts and

- Read / listen for gist
- scan for details
- distinguish between relevant and irrelevant information
- transfer information
- predict plausible outcomes
- guess meaning of words from context
- answer reference and inference questions
- evaluate and respond to evaluation
- react to content

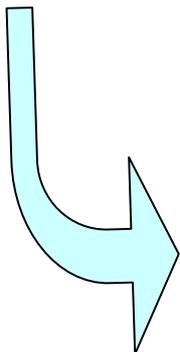

**Assessment will encompass not only outcomes but also processes, progress achieved and efficiency of the procedures followed in both individual and collaborative modes.**

### IN LANGUAGE

The learner will be assessed on his/her ability to recognize/ use accurate grammatical structures and appropriate vocabulary at word, sentence and text levels.

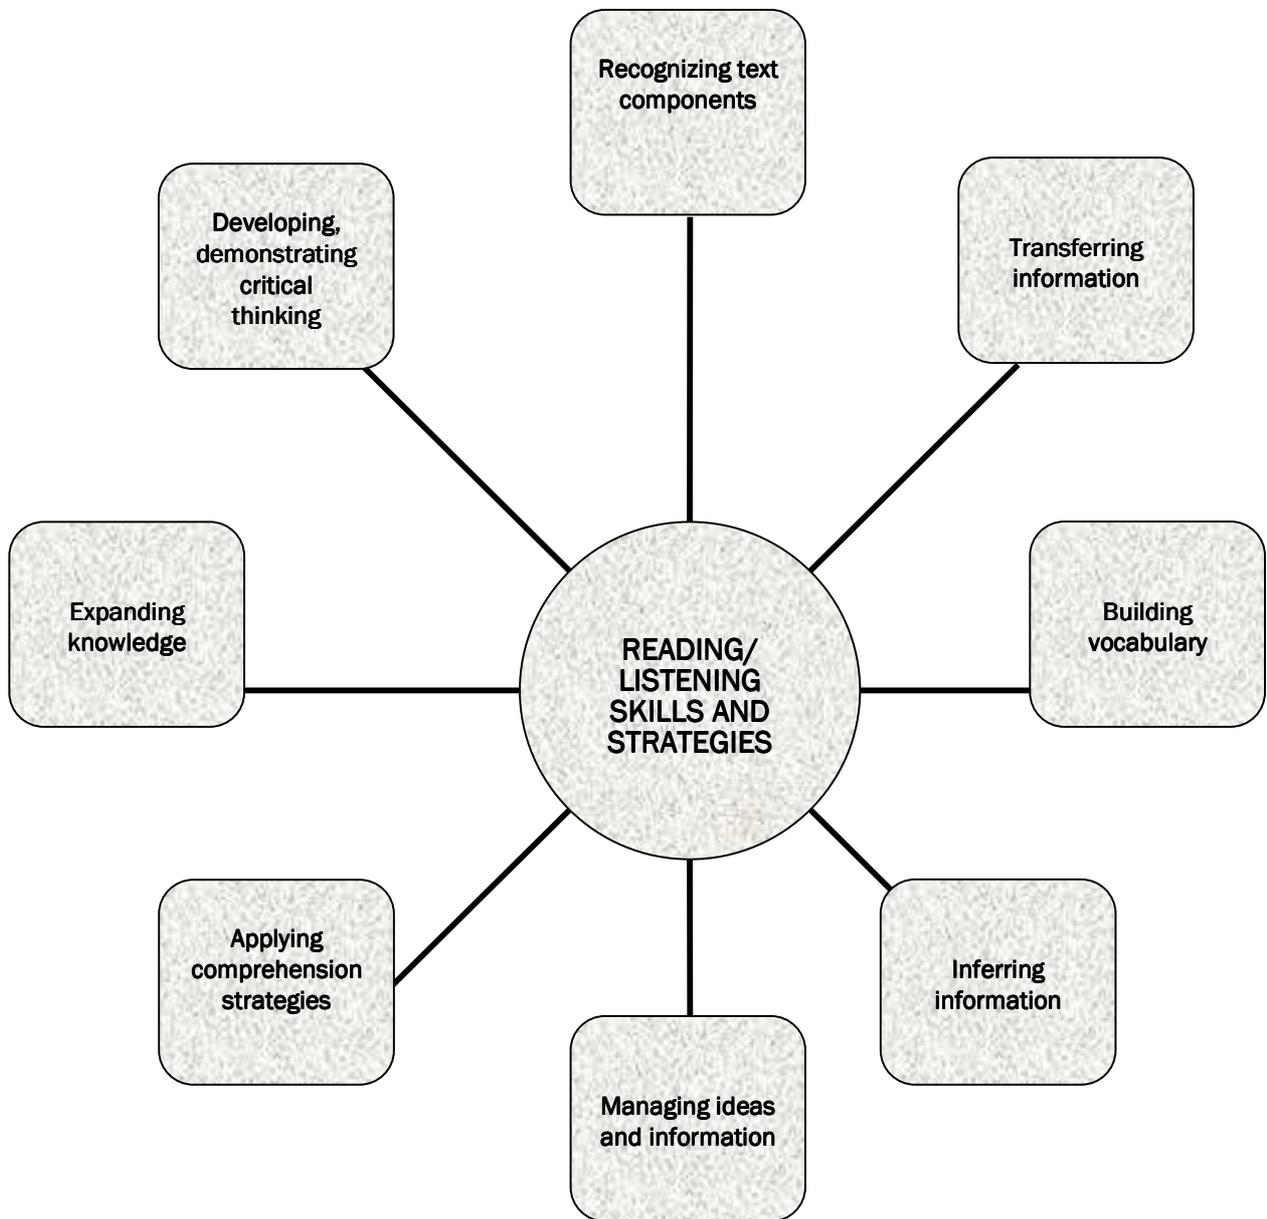

### IN SPEAKING AND WRITING

The learner will be assessed on his/her ability to:

- speak formally / informally to respond to an audience in a variety of contexts
- speak fluently in interactive communication
- speak/write and make presentations on a variety of topics using appropriate language for information and social interaction
- reinvest new words/expressions in one's speech or writing
- report, narrate incidents / events related to own experience in speech or writing
- use logical connectors, capitalization and punctuation marks correctly
- produce a piece of writing using appropriate layout and style
